

PRESS RELEASE

AMOÉBA extends its commercial cover with the signature of a new letter of intent with OXIDINE to distribute BIOMEBA in Spain

Lyon, Bergondo, 15th December 2016 - AMOÉBA (FR0011051598 - AMEBA), the producer of a biological biocide capable of eliminating the risk of waterborne bacteria, announced today that it has signed a Letter of Intent (LOI) with OXIDINE prior to entering into a definitive agreement regarding the distribution of its BIOMEBA product in Spain. This agreement is subject to marketing authorization (MA) that may happen during the first semester of 2017.

This new agreement is strengthening the existing sales network of AMOÉBA in Europe and allows the company to enter the Spanish market. Located in the north west of Spain, OXIDINE is present on the autonomous regions of Galicia, Asturias, Basque country, Navarre, Castilla and León as well as the region of Madrid. AMOÉBA now counts a total of 11 distributors spread over the European and American continents.

Last September, the Spanish authorities granted AMOÉBA the Marketing Authorisation for R&D purposes for 10 Industrial sites. AMOÉBA can now speed up the planning of tests during the course of 2017.

*« The signature of this agreement confirms our determination to associate ourselves to an innovative company in the industrial water treatment sector. BIOMEBA product represents a true alternative to chemicals biocides. » stated **José Manuel VILELA, General director of OXIDINE.***

*« The agreement signed with our partner, OXIDINE, allows us to extend our commercial cover to a new territory in Europe. Spain represents an important market for AMOÉBA bearing in mind the high level of exigence from the Spanish regulatory authorities against the risk of legionella. » added **Fabrice PLASSON, President of the Board of AMOÉBA.***

About OXIDINE: Created in 1997, OXIDINE is based at A Coruña in the northwest of Spain. Main actor of water treatment in the industrial sector, OXIDINE commercialize a wide range of innovative products and services in several areas, Galicia, Asturias, Basque Country, Navarre, Castilla and León and the Madrid region. Our experimented teams developpe tailor-made solutions according to our customers' needs established after a detailed study of each case. For more information: www.oxidine.net

About AMOEBA: AMOEBA develops a biological biocide capable of eliminating waterborne bacterial risk (legionella, pseudomonas, listeria, etc.). This entirely natural solution is presented as an alternative to the chemical treatments traditionally used in the industrial sector and complies with the new regulations in terms of chemical emissions into the environment. In a worldwide market for chemical biocides estimated to be worth EUR 21 bn⁽¹⁾, AMOEBA is today concentrating on the segment of industrial air-cooled towers (ACT), estimated to be worth EUR 1.7bn⁽²⁾. AMOEBA is pursuing the regulatory procedures to obtain the provisional MA for all European countries in "Cooling Towers" application. Based in Chassieu – France. AMOEBA is quoted on compartment C of the Euronext Paris stock exchange and joined the CAC® Small index. For more information: www.amoeba-biocide.com.
