

PRESS RELEASE

AMOEBA signs a Letter of Intent with GARRATT-CALLAHAN

For the distribution of BIOMEBA in the whole of the United States

Lyon (France), Burlingame (CA, USA), January 11th, 2017 - AMOEBA (FR0011051598 - AMEBA), producer of a biological biocide capable of eliminating bacterial risk in water, announced today that it has signed a Letter of Intent (LOI) with GARRATT-CALLAHAN prior to entering into a definitive agreement regarding the distribution of its product in the United States pending marketing authorization.

This new LOI, covering the whole of the USA, follows previous agreements signed in 2015 with Earthwise Environmental for the distribution of the BIOMEBA product in 5 states (Illinois, Indiana, Wisconsin, Texas and Oklahoma) and more recently with AQUA-SERV, for the distribution of the product in 3 additional states (California, Nevada and Arizona).

“Providing our clients with safe products that will treat their water systems, protect their equipment, and provide healthy environments for their visitors and employees is our top priority. We are eager to field test the AMOEBA product line to determine how it works with the Garratt-Callahan line of products and services.” said **Jeffrey L. GARRATT, President of GARRATT-CALLAHAN Company.**

“The partnership with GARRATT-CALLAHAN is the first distribution agreement covering the whole of the United States. GARRATT-CALLAHAN is a national player at the forefront of innovation in the water treatment industry. Many companies in the US are becoming increasingly aware about ecological issues in water treatment and are seeking alternative solutions to chemicals.” stated **Fabrice PLASSON, President of AMOEBA’s Board of Directors.**

About GARRATT-CALLAHAN:

Garratt-Callahan Company is the largest privately owned water treatment company in the USA. Led by Jeff Garratt, President and fourth generation Garratt family member, the company is guided by its mission to provide effective, efficient, and safe water treatment. Established in 1904 the company continues to innovate using advancements including concentrated-solid chemical treatments, remote monitoring and treatment equipment, and the latest in chlorine dioxide generators. Headquartered in Burlingame, California Garratt-Callahan has five manufacturing plants across the country and distribution systems that cover the USA. Visit www.garrattcallahan.com to read more about the company's products, laboratory testing and customized services.

About AMOEBA:

AMOEBA develops a biological biocide capable of eliminating waterborne bacterial risk (legionella, pseudomonas, listeria, etc.). This entirely natural solution is presented as an alternative to the chemical treatments traditionally used in the industrial sector and complies with the new regulations in terms of chemical emissions into the environment. In a worldwide market for chemical biocides estimated to be worth EUR 21 bn⁽¹⁾, AMOEBA is today concentrating on the segment of industrial air-cooled towers (ACT), estimated to be worth EUR 1.7 bn⁽²⁾. AMOEBA is continuing with the regulatory procedures necessary to obtain provisional MA for all European countries for the "Air Cooled Towers" application. Based in Lyon-Chassieu (France), AMOEBA is quoted on compartment C of the Euronext Paris stock exchange and joined the CAC® Small index on 21st September 2015.
